Abdul Khaleel Shaik

Data Analyst at Cartesian Consulting
Guntur

Summary

I worked as an Risk Investigator in amazon for 8 months. We used to handle seller account which had Ton of seller data on which we investigate(one of the prominent and learning aspect) and take actions which makes huge difference to the business. While working as we were handling lot of data i got to know what career i want to peruse in future which was Data Science.

Experience

Cartesian Consulting
Data Analyst
March 2020 - Present (6 months)
Bengaluru, Karnataka

We interpret data and turns it into information that can offer ways to improve a business, thus affecting business decisions. Data Analysts gather information from various databases and interpret patterns and trends.
