Summary

I am a software engineer born and raised in Kerala, the gods own
country. My passion for new
technologies and ideas drives me forward.

My strength is mainly Python. I focus mainly on developing using
python. I am also familiar with Sql, Adobe XD , etc. My main interest
is on Artificial Intelligence using python.

Am a Virgo, The Perfectionist. I like things to be perfect, whatever it
may be.
Imperfection irritates me. I've spent many years trying to perfect what
I do and while I'll never
be perfect, I do my best to reach the closest.

I prefer to keep learning, continue challenging myself, and do
interesting things that matter.
My abundant energy fuels me in the pursuit of many interests,
hobbies, areas of study and artistic endeavors.

I always enjoy taking up projects that's beyond my reach and comfort
zone,
so that I can enrich myself with new knowledge and experience.
